PROFESSIONAL SUMMARY

Computer Science and Engineering student with hands-on experience in Python development, Java programming, Data Structures & Algorithms, AI-powered applications, web fundamentals, SQL, and Git/GitHub. Built practical projects including an AI Task Manager, Java Swing Library Management System, Smart Blind Assistance System, stock portfolio tracker, and web development applications. Strongly focused on structured problem solving and continuous LeetCode practice, seeking Software Development, Java, Python, or AI/ML internship opportunities.

TECHNICAL SKILLS

Languages: Java, Python, SQL, HTML, CSS, JavaScript

Core: Object-Oriented Programming, Data Structures & Algorithms, Problem Solving, File Handling, API Integration

AI/Data: Machine Learning, Computer Vision, YOLOv8, Gemini API, Data Analytics

Databases & Tools: MySQL, CSV/File Storage, Git, GitHub, VS Code, MySQL Workbench

Development: Java Swing, Python CLI/Desktop Applications, Responsive Web Fundamentals, Debugging & Testing

EXPERIENCE

Data Science Intern - Vedupskilling, Trichy

Jul 2026 - Present

- Developing hands-on skills in Python-based data workflows, data analysis, and machine-learning-oriented problem solving.

AI Web Development Intern - InAmigos Foundation (IAF)

Jul 2026

- Completed an AI web development internship focused on practical web development skills, AI-powered web solutions, and software development best practices.

Python Programming Intern - CodeAlpha

Jan 2026 - Feb 2026

- Developed a Python stock portfolio tracker with dynamic user input, investment tracking, and file-based persistence.
- Built a rule-based chatbot using structured input processing and conditional logic.
- Strengthened Python fundamentals across dictionaries, loops, file handling, and object-oriented programming.

SELECTED PROJECTS

AI Task Manager

Python, MySQL, Google Gemini API, CustomTkinter

- Built a full-stack AI-powered desktop productivity application with task management, category filtering, and persistent relational database storage.
- Integrated Gemini API to generate strategic step-by-step execution plans for user goals.
- Implemented secure email OTP authentication, background scheduling, desktop notifications, and a modern light/dark interface.

Smart Blind Assistance System

Python, Computer Vision, YOLOv8

- Developed an AI-powered accessibility prototype that detects obstacles in real time and provides directional audio guidance.
- Implemented hazard detection and spatial voice-assistance concepts for navigation support.
- Secured 2nd Place at AKKADIANZ'26 National Technical Symposium.

Library Management System

Java, Swing, CSV

- Developed a GUI-based library management system using Java Swing, OOP principles, role-based workflows, and CSV file persistence.
- Implemented user/book/transaction management with persistent local storage and modular desktop UI design.

Stock Portfolio Tracker

Python

- Created a Python CLI application for tracking stock investments, including quantity input, portfolio value calculation, and text-file persistence.

EDUCATION

B.E. Computer Science and Engineering - K. Ramakrishnan College of Engineering, Trichy

2024 - 2028

CGPA: 8.14

CERTIFICATIONS & ACHIEVEMENTS

- NPTEL Elite - Cloud Computing Fundamentals (IIT Kharagpur)
- HackerRank - Python Programming Certification
- Basics of Python - Cambridge / UniAthena
- CodeAlpha - Python Development Internship Certificate
- 2nd Place - AKKADIANZ'26 National Technical Symposium
- Active DSA / LeetCode practice with organized Easy, Medium, and Hard problem solutions on GitHub (github.com/iamarunsarvesh12)
